Clear space & minimum size

- Maintain clear space around the logo equal to the sparkle accent's height on all sides.
- Full lockup: never smaller than 120px wide in digital contexts.
- Icon mark alone: never smaller than 24px wide.

Don'ts

- Don't recolor the mark outside the approved purple/gold gradient or white monochrome.
- Don't stretch, skew, or distort proportions.
- Don't add drop shadows, outlines, or unapproved effects.
- Don't place the full-color logo on busy photography — use logo-white.svg instead.

3. Color Palette

Swatch	Name	Hex	Usage
	Royal Amethyst (Primary)	#6A0E7D	Primary brand color, buttons, links
	Deep Amethyst	#2D0A42	Gradients, dark backgrounds, hero sections
	Champagne Gold	#C9973F	Accent color, highlights, CTAs on dark
	Light Gold	#E4BE7E	Gold on dark backgrounds, hover states

Gold Accent Gradient: linear-gradient(135°, #C9973F 0%, #E4BE7E 100%) — used sparingly for premium accents.

Accessibility

- #6A0E7D on #FDFBFB passes WCAG AA for normal text (contrast $\approx$ 8.9:1).
- #C9973F on #2D0A42 passes WCAG AA for large text/UI components (contrast $\approx$ 4.7:1); use #E4BE7E for small body text on dark backgrounds.
- Never place gold text on white for body copy — reserve gold-on-white for large display type only.

4. Typography

Primary Typeface: DM Sans

- Headings: DM Sans Bold (700) or Medium (500), generous letter-spacing on all-caps treatments.
- Body copy: DM Sans Regular (400).
- UI labels/captions: DM Sans Medium (500), smaller sizes, tight but legible letter-spacing.

Fallback stack: 'DM Sans', 'Helvetica Neue', Arial, sans-serif

5. Iconography

- Use a single, consistent icon library across the product (lucide-react).
- Category icons follow a circular badge treatment: soft tinted circle background with a simple line icon in brand purple or gold.
- Icons should be simple, single-weight line icons — no gradients or photographic icons in the UI.

6. Spacing & Layout

- Base spacing unit: 4px, scaling in multiples of 4.
- Cards and containers use generous padding (16–32px) to preserve a premium, minimal feel.
- Avoid dense, cluttered grids — prefer fewer items with more breathing room.

7. Tone of Voice

- Warm but professional — speak like a trusted friend, not a corporate FAQ.
- Empowering — reflect “Discover. Shop. Empower.” and celebrate sellers and buyers alike.
- Clear over clever — prioritize clarity in transactional copy; save personality for marketing.
- Locally grounded — reference Kenyan context naturally (KES, M-Pesa, local delivery).
- Avoid dated slang, exclamation-point overload, and fear-based urgency tactics.

8. Photography

- Favor natural light, real people, and authentic Kenyan settings over staged studio photography.
- Product photography: clean, neutral or brand-tinted backgrounds, consistent crop ratios per category.
- Lifestyle photography: warm, candid, diverse representation of Kenyan women across ages and styles.

9. Marketing Usage

- Use og-image.png (1200×630) for link previews (Open Graph/Twitter cards).
- Use social-banner.png (1600×900) for social posts and paid marketing creative.
- Always maintain minimum clear space — never overlay copy on the icon mark.
- Co-branding: Zuri Market logo stays visually dominant; partner logos are sized no larger than the Zuri Market mark.
